INNOVATION 2019

# The magnetic device for helping strapping

## Experience

**Liftplaq Eurosign**<sup>®</sup> works for 10 years in research and development of tools for risk prevention and for the improvement of working conditions

The **Liftplaq**<sup>®</sup> tool is recognised and exported in 30 countries awarded many times at national and international events and exhibition

The designer of **Liftplaq**<sup>®</sup>, the manhole cover magnetic lifting tool, has developed an invention for universal and daily use for transportation: the **Rainette**<sup>®</sup>

## What is innovation?

The **Rainette**<sup>®</sup> is the result of a simple observation, the almost systematic stall of the strap fixation encountered by carriers when doing power-up by action of pawl.

## Purpose

- Make a perfect strapping the first time
- Delete back and forth for adjustment
- Avoid unsafe practices
- Reduce risk of accident at work
- Save time on operations

## TRANSPORTATION PROFESSIONAL TOOLS >> HANDLING EQUIPMENT

### Technical data sheet

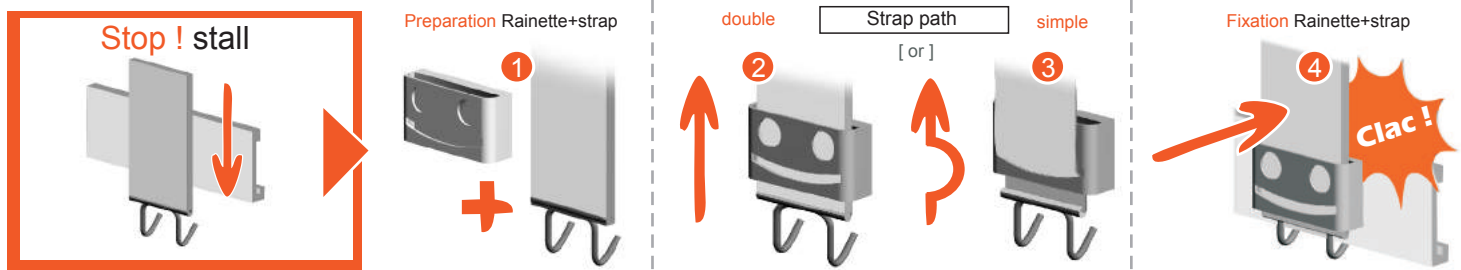

- The Rainette® is a safety device to help and ease the handling of strap fixing and securing loads on trucks
- This system is equipped with 2 industrial magnets, to obtain a strong magnetic adhesion and avoid the unhooking of the end of the strap at the moment of tensioning.
- The Rainette® has a PVC body whose format is designed to adhere to all usable metal areas of truck (platform, side bars, reinforcements ...) and to adapt to different thicknesses of straps.

« A friend who will never release »  
Adhesion strength: **20kg**

Succeed fixing the strap  
**the first time!**

### Manual

The Rainette is the solution facing to the stall. It stays on the strap for the next use. Once is done, is forever.

Easy to set up, lightweight and durable

### Characteristics

Force / Magnetic Capacity	20 Kg
Length	70 mm
Width	40 mm
Thickness	20 mm
Magnets diameter Neodyme	25 mm
Material	PET
Weight	65 Gr
Réf	Rainette
Manufacturer / Exporter	Oui

### Available colors

### Conditioning

Recyclable materials Responsible eco action

 **Efficiency**  
time and energy saving

 **Easy & fast**  
only one person needed

 **Safety**  
avoid the risks of fall
